

FESTAS 2026 NEXUS

Art & Science Festival

Napoli, 22-26 June 2026

NEXUS are connections, ties, relationships, and intersections between themes and disciplines, between sensory and cerebral experiences, between emotions and knowledge, between people, across time and space.

NEXUS is a journey to the places where art and science collide, an exploration without a map, without a predetermined itinerary, guided by five key words: Nature, Environment, Xxi Century, hUmanity, Society. A skewed acrostic that will inspire artists and scientists in their productions and engage spectators.

NEXUS is the first experiment of FESTAS, a series of events that examines the complexity of the world we live in, and the world that awaits us, from multiple perspectives, exploring the connections between human activities and the environment, between nature and society, without simplifications, with awareness, and with emotions.

Friday 26 June 19:30
